

START WITH ONE CHANGE

Your website is beautiful. It just doesn't speak *English*.

An **International** Pastry Academy and a café at Prague Castle, welcoming guests from all over the world — yet the café site and e-shop they order from, **ippacafe.cz**, only speak Czech. We don't want to rebuild it. We want to add the one thing it's missing: **a proper English version**.

⇒ You just switched this whole page between languages, up in the corner. Your visitors can't do that on yours.

branches, incl. the
Castle

An **International** café at the Castle, in front of a mostly foreign crowd — and the shop they order from, **ippacafe.cz**, is Czech-only. Prague Castle 2025, autumn visitor survey.

Photo · Pexels

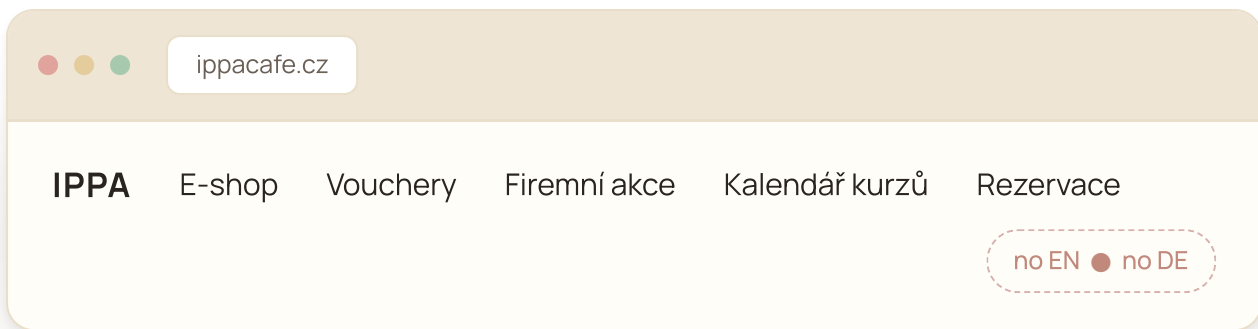

PRAGUE CASTLE · 77% FROM ABROAD

The whole world
walks past your door.
Let it read the sign.

THE ONE GAP

A visitor from abroad hits a wall on the first click

Your café site (**ippacafe.cz**) has no language switch, anywhere. Every menu, cake, voucher and reservation is Czech-only. A tourist outside the Castle café, or a company looking for a corporate gift, opens it and cannot read a word.

This is the real navigation, today. There is nowhere to click for English. That's the whole problem — small, and fixable.

— BEFORE → AFTER

Same site, same design, now readable

Your real page text, translated cleanly. Nothing about the look changes. A visitor flips one switch and the whole site is in their language.

 CZECH, TODAY	 ENGLISH, ADDED
Slavnostní dorty	Celebration cakes
Kurzy pro začátečníky a pokročilé	Courses for beginners and the more advanced
Kurzy pro děti	Courses for children
Darujte zážitek	Give the gift of an experience
Dárkové poukazy do našich kaváren	Gift vouchers for our cafés
Připravené k vyzvednutí už za pár hodin	Ready to collect in just a few hours

— WHERE YOU STAND

You have the brand and the location. You're just missing the one thing they all have.

English, online ordering and gift vouchers are already normal for Prague patisseries — even ones without a Castle address or an international academy. This isn't a luxury upgrade. It's catching up, then leaping.

PRAGUE PATISSERIE	ENGLISH	ONLINE ORDER	VOUCHERS
nasladko.cz	✓	✓	✓
frutiko.cz	✓	✓	✓
bakeshop.cz	✓	✓	✓
sugarmama.cz	✓	✓	✓
ippacafe.cz	✗	✗	✗

Based on their public websites, July 2026. The gap is the opportunity: you have the brand and the location they don't – you're just invisible to anyone who doesn't read Czech.

WHAT WE ACTUALLY DO

We add English to the site you already have

No redesign, no migration, no starting over. We work on your existing site and add the language layer it was built to support.

A language switch

A clean EN toggle in the header, on every page, styled to match your current design.

Every page translated

Academy, e-shop, cakes, vouchers, reservations and the legal pages, in natural English written for real customers.

Found in English

Set up so Google shows the English page to people searching in English, not the Czech one.

Tested and handed over

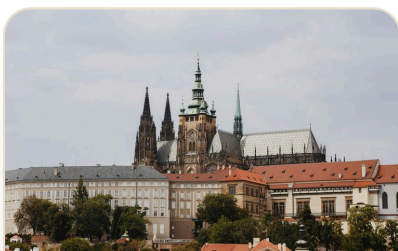

Checked on phone and desktop, every link and the whole online shop working in English before we launch it.

What we do not touch: your design, your photography, your brand, your e-shop, or the agency work you already paid for. We add, we don't replace.

WHY IT PAYS FOR ITSELF

The customers are already at your door

Prague Castle sends ~2.7M paying visitors past your door a year, 77% from abroad. Win even a sliver of that online and English pays for itself many times over — the 45,000 Kč is a rounding error against the traffic already there. (Illustrative, not a promise.)

Tourists at the Castle

Guests at your Prague Castle café can finally read the menu, book a course and buy a cake to take home.

Gifts and vouchers

English-speaking visitors and expats buy vouchers and celebration cakes online, in a language they trust with a payment.

Companies

International firms in Prague booking corporate gifts and team pastry courses can order without needing a Czech speaker.

THE MATH

What English could realistically bring you

An illustrative model on real figures — not a promise. About **2.08M foreign paying visitors** pass the Castle each year, and CSA Research finds **40% never buy in a language they can't read**. Today your Czech-only shop converts almost none of them online. Remove the wall and capture just a sliver:

CONSERVATIVE

~0.9M Kč / yr

1 in 1,000 foreign visitors orders once online — about 6 orders a day at 450 Kč.

EXPECTED

~2.6M Kč / yr

1 in 400 orders once — about 14 orders a day at 500 Kč.

💰 **Pays for itself in weeks.** The 45,000 Kč English version is about 100 online orders. Even counting only ~30% profit per order, that's back in ~8 weeks in the conservative case, ~3 in the expected one.

40 % won't buy in a language they can't read · CSA

76 % prefer to buy in their own language · CSA

Online orders ~18–23% bigger · Lightspeed/Toast

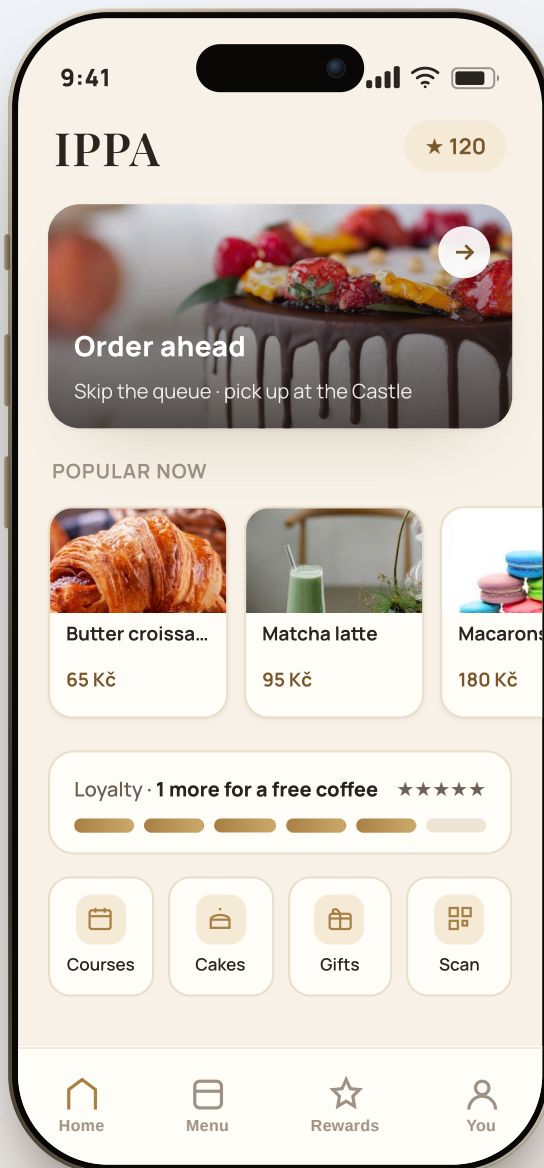

Selling direct saves the 15–30% app fee · Rezku

Deliberately conservative: this ignores your Czech regulars, the 3 other branches, the 15–30% fee saved by selling directly, loyalty repeat visits, and higher-value courses & vouchers — each only adds to it. **Reported elsewhere** (real, but not Prague cafés): **REVIEWS.io** saw 20% more buyers after adding German (Weglot); a US BBQ spot saved ~\$98k in delivery-app fees by selling directly (ChowNow).

— PHASE 2 · AFTER ENGLISH

One app: order ahead, earn a reward, come back

Your **62,000** Instagram followers and every Castle tourist in one place. Skip the queue, collect a loyalty stamp, book a course, reorder the cake — and it keeps the 30–40% that delivery apps take.

Why your own app, not just Wolt: delivery apps take 30–40% per order once fees are counted, and keep the customer. Your app keeps the profit, the customer data and the relationship. Below is roughly where each version lands – the **final price is by agreement**, once we scope what it actually needs to do. For a single café, **most start on a proven platform** (the recommended option) and move to a fully custom app only once they outgrow it.

RECOMMENDED START

BRANDED APP · PROVEN
PLATFORM

Get it live

from ~35,000
Kč

+ ~7,900 Kč / mo · ~4–6
weeks

- ✓ Order-ahead + pickup at all 4 branches
- ✓ Loyalty stamps, gift cards, phone reminders
- ✓ 3 languages · card payments
- ✓ Branded on a proven platform

CUSTOM APP · UPGRADE

Own it

from
~290,000 Kč

+ ~9,900 Kč / mo · ~4–6
months

- ✓ Everything in Get it live, fully owned
- ✓ Your own custom design — you fully own it, not tied to us
- ✓ Course & cake booking, loyalty card in the phone
- ✓ No per-order platform fees

PREMIUM · FOR A CHAIN

The full machine

from
~490,000 Kč

+ ~14,900 Kč / mo · ~6–9
months

- ✓ Everything in Own it, plus:
- ✓ AI helper for customers + subscription boxes
- ✓ Links to your till, stock and sales reports
- ✓ Smarter, personalised phone reminders

Indicative ranges, not fixed quotes. The custom tiers build on the same proven ordering, loyalty and payment core and already run on both iPhone and Android — so a custom app costs far less than building from scratch. The final price is by agreement, scoped on a short call. Plus store fees: Apple \$99/yr, Google \$25 once.

EVERYTHING WE CAN DO

English is the start. Here is the whole menu.

Every one of these is tied to something real at Ippa, and we scope and price each as you're ready. No big-bang project: start with English, prove it, then pick what's next. ★ = the starting deal · New = added after researching your market.

1 Speak every visitor's language

English version of the whole site

START HERE

The starting deal: menu, e-shop, academy, all of it.

QR menu at the table

Scan at the Castle café, read the menu in your language. Online orders run ~18–23% higher than at the counter.

A 24/7 helper that speaks any language

Answers allergens, hours and how to reach you, any time.

German too, for the tourist crowd

Prague runs on German and Austrian visitors. Add DE next.

Allergen & menu info, every language

NEW

Tourists trust a counter that answers “what’s in it?” before they ask.

2 Get found before they arrive

A Google profile that sells

Maps, reserve and order from Google, English reviews up top. That’s where a tourist starts.

TripAdvisor & review presence

NEW

Tourists read reviews before they walk in. Own that first impression.

A branch finder that works for tourists

Four branches on one clear English map with hours and directions.

Instagram turned into a shop

62,000 follow you and can buy nothing from a post. Make the feed shoppable.

Cards in the hotels by the Castle

A QR info card at nearby hotels sends English guests straight to you.

3

Turn one visit into many

A QR code on every box

One scan reorders the cake, books a course or leaves a review.

Email flows that bring buyers back

After a purchase, a left cart, a birthday. Automatic. Email returns ~\$36 per \$1.

A monthly pastry box, on subscription

One order, revenue every month. Perfect for expats and offices.

Your thousands of reviews, on the site

Five stars everywhere but your own page. We fix that.

Gift cards & loyalty in the phone wallet

Straight into Apple and Google Wallet. Nothing to lose.

4

Sell what earns you the most

Academy: waitlists instead of discounts

RECOMMENDED NEXT

Courses sell out, then you cut 20–33% to fill. Stop giving it away.

Corporate & gifting portal

RECOMMENDED NEXT

Bulk vouchers, team courses, recurring office deliveries.

Gift an experience: course vouchers

A beautiful e-gift delivered the second it's bought.

Design-your-own cake, with an instant quote

The bespoke and wedding flow your site doesn't have yet.

Masterclass & guest-chef ticketing

NEW

Sell seats to big names, then sell the paid replay to the world.

5 Run it like a machine

Online table reservations

You say you don't take phone reservations. So let people book online.

An AI agent that answers the phone

Restaurants miss ~43% of calls. It picks up 24/7, any language, and takes the booking.

WhatsApp order & booking line

NEW

The channel tourists already message on. Meet them there.

Seasonal campaigns on autopilot

Christmas, Easter, Valentine's. Page, email and social, ready on time.

One simple overview: where the money is

What sells, which courses fill, which branch, at a glance.

6 Beyond the four walls

Delivery platforms, done right

NEW

On Wolt and foodora for reach — but push your own ordering to dodge the 30–40% cut.

Catering & events booking

NEW

Weddings, offices, parties — quote and book big orders online.

A wholesale portal for hotels & cafés

NEW

Supply hotels and cafés with a standing-order portal.

Self-order kiosk at busy branches

NEW

Cut the Castle queue; people also order a bit more at a kiosk.

Membership club: unlimited coffee

NEW

A monthly pass locals pay for and use daily.

3D “design your cake” preview

NEW

See the bespoke cake before you buy it.

You don't pick all of it. You pick the next one. We scope and price each properly once English is live and the first win is on the board.

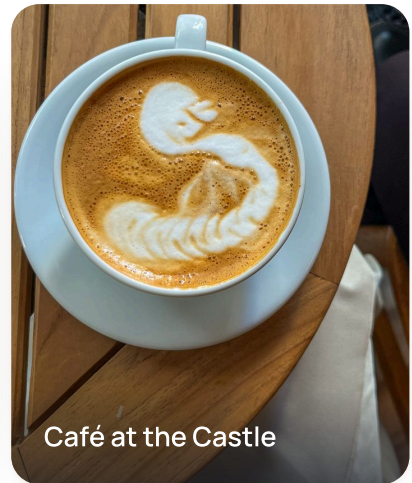

Courses, cakes, coffee — now online too

Bespoke cakes

Academy courses

Café at the Castle

— SCOPE AND INVESTMENT

THE STARTING DEAL

45000 Kč

one-time, from. Roughly 2 to 3 weeks.

- ✓ **Language switch** on every page
- ✓ **Full English translation** of the site and e-shop
- ✓ **Found on Google in English**
- ✓ **Tested** on mobile and desktop

THEN

Once English is live, the two highest-return next steps are the **Academy booking with waitlists** and the **corporate & gifting portal** — both attach to your best-earning products that already sell out. We quote each on its own.

Optional afterwards: a small monthly to keep new courses, cakes and posts bilingual as you add them. We can quote that once English is live.

— READY WHEN YOU ARE

Say yes, and English is live in about three weeks

1

You share access

You give us the site and confirm which pages. We agree the scope in one short call.

2

We translate & build

Natural English (and German), the switch on every page, and set up so Google finds the English pages. First draft in about a week.

3

We test & go live

Checked on phone and desktop, every link and the e-shop working – then it's live. About 2–3 weeks in all.

✉ **Start with English**

No-risk, step by step. You approve each stage before we start the next – and if a stage isn't right, that stage is on us. You're never locked into work you haven't signed off.

Everything you're reading – the English, the German, this whole build – is our work; **this page is the sample.** Your translation is written for real customers and checked by a native speaker, not machine output.

About the numbers. Prague Castle 2025 visitor figures and the 77% foreign share: Prague Castle Administration / Prague Daily News & expats.cz. Digital-order, email, voucher, loyalty and missed-call figures are industry benchmarks (Lightspeed, Toast, Olo, Paytronix, Klaviyo, Baymard, gift-card market reports and voice-AI vendors) – directional, not a promise for your venue. Competitor comparison from public websites, July 2026. The Czech text in the demo is Ippa Café's own current site copy; the English is our proposed translation. This is a proposal, not a live change to your website. The "what English could bring you" figures are an illustrative model, not a forecast – built on CSA Research "Can't Read, Won't Buy" (2020), Prague Castle 2025 footfall (expats.cz), digital-order uplift (Lightspeed, Toast), delivery commissions (Rezku), and external, non-peer examples via Weglot and ChowNow.
